SUPER MESNAKE 2

INSTRUCTION MANUAL

This official seal is your assurance that Nintendo has not reviewed this product. They might even be unhappy about it being made. Always look for this seal when buying games, even though anyone with a scanner or paint program could easily reproduce it.

1 Introduction

Thank you for selecting Super NeSnake 2 for the Nintendo Entertainment System. This cart is designed for an authentic Nintendo NES and may not work on all clone systems.

OBJECT

Slither around 25 obstacle filled levels collecting numbers. Each time you eat a bonus, your snake gets longer! This game works better than that blue pill... Once you beat each difficulty, play with a friend!

Please read this instruction manual to ensure proper handling of your new game, and then save the booklet for future reference and eBay sales.

2 Precautions

1) This is a high precision cart. It should not be stored in places that are very hot or cold. Never hit or drop it. Never get it wet. Unless you know exactly what you are doing, never take apart.

2) Avoid touching the connectors, do not get them wet or dirty. Doing so may stop the cart from working correctly.

3) Read the instruction booklet thoroughly.

3 Using the Ciclone

The Super NeSnake 2 cart includes the Ciclone multi region lock out chip. Plug in the cart and turn on the NES. If your system is blinking but shows video try pressing the reset button. This will tell the Ciclone to try the next region. When the correct region is found it will be saved so this process should only be needed once. If you have hit reset 8 times and it is still blinking your 72 pin connector inside the NES may need to be cleaned or replaced. Blowing on the cart will add condensation that may damage the cart.

4 Controls

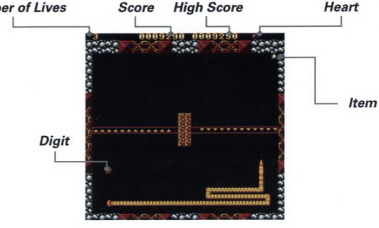
Slither your way through the level with precise turns. Be sure to avoid hitting walls or other objects.

D-pad - Move your snake in all directions

START - Select menu items & pause during game

5 Gameplay

Your goal is to eat all the 9 digits that appear in the playfield, which advances you to the next level. Each one will make your snake longer. If you hit your own body or a wall you will lose a life and have to start again. When your score rounds over 10,000 you can get that life back!



6 Items

DIGIT: The key to your survival! Get them as they count from 1 up to 9.

WALL: Walls are the main obstacles. Steer away in time before eating bricks!

ONE-WAY WALL: They allow you to cross in the direction they are pointing. Cross the wrong way and you will crash.

APPLE: Apples grant you 500 points. Collect many apples to get extra lives. There are no poisoned apples for this snake.

STAR: The star gives you 1,000 points and invincibility to walls for a short time. When it starts blinking the normal color, get to a safe area as fast as you can!

SWITCH: Alter the layout of the level. They are used to get everywhere in the playfield. In 2 Player Mode, try to use switches to crash the other snake.

HEART: If you crash and have any hearts, you are reset at the start position without losing a life. You still must collect the digits again.

7 Modes

1 Player Quest Mode

In this mode you get a sequence of levels that you must beat. Clear all the levels to unlock the next difficulty setting. Any level you reach will also be unlocked for practice.

1 Player Practice Mode

Replay any unlocked level with infinite lives for practice. Unavailable levels will have their name shown as "???".

2 Player Modes

Play against one of your friends or against the computer in two different multiplayer games.

Team: Each player starts with 5 lives and plays cooperatively. If both players crash the game restarts on the current level.

Versus: Each player gets one point for each digit captured, and one point when the other player crashes.

8 Passwords

When all your lives are gone a short 4 letter password is displayed. Write this down or remember it, then enter it later in the Password section. All your levels will be unlocked!
